Adriana Latorre

Software Developer

👤 Profile

After 15 years as a professional photographer, I transitioned into technology. I completed a course in the JavaScript/Node.js stack, gaining experience with tools like ExpressJs, Sequelize, MongoDB, MySQL, Multer, Bcryptjs, Jsonwebtoken, and also React and React Native, using Jest for unit testing. This led to a strong interest in mobile development, and now I'm focused on advancing my skills in React Native and Kotlin for Mobile Development.

💼 Employment History

Software Developer at Tupi - Electric Mobility

November 2023 — Present

I am part of the Technology Development team at Tupinambá, focused on driving innovative solutions for electric vehicle charging. Currently, I am involved in the development of an advanced eletropoint management system, aiming to efficiently connect chargers to an intelligent ecosystem, providing a superior experience for electric vehicle users.

- Debugged software, identified root causes, and proposed solutions to software issues
- Installed and configured various software applications and services to support the organization's needs

Software Developer at Givisiez Company

January 2023 — November 2023

PADA Allergy Project - Worked as part of the React Native TypeScript Mobile Team, developing an application for managing patients with allergies. The app registers patients and provides their doctors with detailed information on treatment and vaccination schedules. Collaborated within a multidisciplinary team, including Front-end, Back-end, Q.A., Data Engineering, and Cyber Security, utilizing Scrum methodology for project management.

- Utilized Firebase to store and retrieve data, resulting in improved app performance and reliability
- Leveraged the Android SDK to create custom views and animations, enhancing the user experience

🎓 Education

Computer Programming, Digital House Brasil, São Paulo

March 2022 — September 2022

Photography, Senac, São Paulo

January 2006 — January 2010
